AGRICULTURAL INTERNSHIP IN DENMARK

Practical European Agricultural Experience for Students from Africa & India

Are you currently studying Agriculture or a related agricultural field at a college or university in Africa or India?

An Agricultural Internship in Denmark provides eligible students with an opportunity to gain practical experience on modern Danish farms while developing professional skills in agriculture, livestock production, horticulture, farm management and sustainable farming.

WHO CAN APPLY?

The programme is specifically designed for current agriculture students who are enrolled in a recognised college, university or agricultural institution.

Basic Eligibility

Applicants should:

- Be 18–29 years old
- Be currently enrolled in a college or university
- Be studying Agriculture or a related agricultural discipline
- Have a valid passport
- Have sufficient English-language ability
- Be physically and practically prepared to undertake agricultural work
- Meet the applicable Danish internship, documentation and immigration requirements

Important: Applicants must be current students. The programme is not intended as a general overseas employment programme for people who are not enrolled in an agricultural course.

AGRICULTURAL FIELDS

Depending on the applicant's academic background and available placement, opportunities may include:

- Dairy farming
- Livestock production
- Pig production
- Poultry farming
- Horticulture
- Greenhouse production
- Crop production
- Animal husbandry
- Agricultural machinery and technology
- Farm management
- Sustainable agriculture
- Precision farming
- Animal welfare and biosecurity

WHAT WILL YOU EXPERIENCE?

During the internship, students can gain practical exposure to modern European agricultural systems and learn how professional farms operate on a commercial scale.

Students may develop skills in:

Modern Farming Techniques
Learn practical methods used in Danish agricultural production.

Technology & Mechanisation
Gain exposure to agricultural machinery, automation and modern farming technology.

Animal Production
Develop practical knowledge of livestock management, feeding, animal welfare, hygiene and farm routines where applicable.

Crop & Horticultural Production
Gain practical experience in planting, cultivation, harvesting and modern production techniques where applicable.

Farm Management
Understand how commercial farms organise labour, production, resources and daily operations.

Sustainable Agriculture
Learn about efficient resource use and environmentally responsible agricultural practices.

PAID INTERNSHIP

Eligible trainees may receive a **monthly trainee allowance/salary**, depending on the specific programme and internship contract.

Accommodation may also be arranged through the host farm, subject to the terms and conditions of the individual placement.

The exact allowance, accommodation cost, working hours and other conditions are determined by the applicable internship contract and Danish requirements.

INTERNSHIP DURATION

Depending on the programme and placement, agricultural internships can run for several months and, for eligible programmes, **up to 18 months**.

APPLICATION SUPPORT

Applicants can receive guidance throughout the process, including:

1. Eligibility assessment
2. Academic document assessment
3. CV and application preparation
4. Internship placement
5. Internship documentation
6. Visa/residence application guidance
7. Pre-departure preparation
8. Travel arrangements
9. Arrival orientation
10. Support during the internship

WHY DENMARK?

Denmark offers students an opportunity to experience a highly developed agricultural environment where technology, mechanisation, sustainability, animal welfare and efficient farm management are integrated into commercial farming.

The international experience can help students develop practical skills that complement their classroom education and prepare them for future careers in agriculture and agribusiness.

YOUR AGRICULTURAL CAREER CAN GO INTERNATIONAL

If you are an agriculture student aged 18–29 currently enrolled at a college or university in Africa or India, this programme can provide an opportunity to take your classroom knowledge into a real European agricultural environment.
